

**Quality, Health, Safety & Environmental Protection
(QHSE) Policy**

The objective of Atlantic Towing Limited is to continue to be a first-class marine services provider, within a business culture where the health and safety of our personnel, as well as protection of the environment, have priority.

As a company we are committed to:

- a) Complying with all applicable legal and industry requirements relevant to occupational health and safety, as well as environmental protection;**
- b) The highest standards of risk management in the conduct of our operations;**
- c) Preventing pollution and adopting environmentally responsible practices;**
- d) Excellence in vessel performance and customer service, aiming at exceeding the expectations of our customers;**
- e) Continuously improving our health, safety, environmental protection and customer satisfaction standards; and**
- f) Achieving superior operational efficiency through the deployment of business improvement strategies.**

We have implemented an integrated Quality, Health, Safety & Environmental Protection (QHSE) Management System, which provides a dynamic framework of policies, procedures and instructions designed to achieve our stated goals.

All personnel onboard and ashore are to become fully involved and make the best use of their abilities in achieving the company's objectives.
